Reporting to the Manager, HMMS Supply Chain Technology, this role plays an integral part in ensuring new/changes to data records in our core system applications (McKesson, Cerner, Oracle WCC) are accurate and comply with external/internal policies and procedures (MIS, BPS Directives, GS1 Canada).

This role is the gatekeeper to data integrity and is responsible for organizing and processing requests for core table adds/changes (i.e. Item, Vendor, E Requisition (Order) Approval Leader, Delivery Locations, electronic document management) to ensure accuracy and resolve inconsistencies before processing. The Data Administrator manages user functional rights and cost center security privileges for our HMMS Application Users.

Close attention to detail, initiative and critical thinking when faced with competing priorities and processing high volumes is required to be successful. The Data Administrator must have the ability to think broadly and consider impacts across systems and within the organization.
