Full Time	Andrew Harriman-Duke, Human Resources
OPSEU Paramed	

REPOSTED

It is understood that the hours of work reflect the current scheduling arrangements and are subject to change as determined by the Employer.

The Treatment & Rehabilitation Program has adopted the Psycho-social Rehabilitation and Recovery Model as its overarching philosophical framework. This philosophy is built on a set of principles and values that emphasize client and family involvement in decision making, client choice, the provision of a range of services to meet treatment, rehabilitation and support needs, and a commitment from mental health services professionals to achieving the best possible outcomes for clients based on their stated preferences, wishes, desires and life plans. In order to make this vision a reality the program will ensure that all of its clinical staff have the necessary skills by providing education and training, and will put in place an evaluation framework to measure quality of services delivered including client outcomes.

Using the principles of client centered care within the context of an interdisciplinary team approach, the successful candidate will provide care to clients with severe and persistent mental illness.

Essential Qualifications

- Registered with the Ontario College of Social Workers and Social Service Workers
- Masters of Social Work
- At least two (2) years related social work experience
- Knowledge of a Safety Culture in a Health Care Setting in compliance with the OHSA
