The Forensic Psychiatry Program has adopted the Psychosocial Rehabilitation and Recovery Model as its overarching philosophical framework. This philosophy is built on a set of principles and values that emphasize client and family involvement in decision making, client choice, the provision of a range of services to meet treatment, rehabilitation and support needs, and a commitment from mental health services' professionals to achieving the best possible outcomes for clients based on their stated preferences, wishes, desires and life plans. As part of the forensic system, this must also be accomplished within the parameters defined by the Ontario Review Board within each patient's Disposition order. The Forensic Psychiatry Program is also highly invested in both education and research and has various connections with the University of Western Ontario.

Working with an interdisciplinary team, the successful candidate will provide nursing care to clients with severe and persistent mental illness who have come into conflict with the law.
